EXAMINER'S AMENDMENT

1. The following is an examiner's statement of reasons for allowance: the closest prior art found and relied upon did not disclose a "test tap adapter providing measurements in a transformer bushing and arranged for extracting samples of gases dissolved in insulating oil present in the transformer bushing so as to determine presence of the gases in the insulating oil, the test tap adapter including a tap connector, a tubular runway axially disposed in the tap connector and having a portion extending outside the tap connector, the portion constructed to penetrate into the transformer bushing and to soak in the insulating oil, an insulated conductor mounted in the tubular runway along entire length thereof and having a free length for connection to a conductor provided in the transformer bushing, means for connecting an end of the insulated conductor opposite the free length to an electrical measurement means, and means for anchoring the test tap adapter to the transformer bushing through an opening provided therein, with the outside portion of the tubular runway inside the transformer bushing in contact with the insulating oil, wherein the test tap adapter additionally comprises a gas diffusing member of nonconductive material mounted over the outside portion of the tubular runway, gas permeable but liquid impermeable means covering the gas diffusing member and arranged to allow permeation of gases that may be present in the insulating oil towards the gas diffusing member, gas storage chamber linked to the tap connector, in operative contact with the gas diffusing member and means to allow passive diffusion of

permeated gases present in the gas diffusing member towards the gas storage chamber for determining the presence of gases in the insulating oil." In the examiner's opinion it would not have been obvious to modify the prior art to include these limitations.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to André K. Jackson whose telephone number is (571) 272-2196. The examiner can normally be reached on Mon.-Thurs. 7AM-4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
